13th Annual Family Café
No Registration Fee Required!

**Box Lunches will be available for purchase

Make consumer, family and youth the voice that sparks lasting systems change...

Become an authentic leader and reflect the voice of real people, real lives, and real needs...

The effectiveness of successful systems change is largely dependent on the individuals who can lead a group, participate in the movement, tell a story, make a point, and reflect the voice of others. Be a leader who knows exactly when and how to advocate. **Beyond the Basics** prepares advocates and leaders to serve as the energy behind system transformation, moving from where they are to a new level of confidence, collaboration, and commitment with a team of peers.

Are YOU ready for:

- A highly interactive, multi-module course for leaders ready to take their role in system transformation to a higher level?
- To learn how to develop and use systems change tools?
- To receive targeted instruction to enhance your capacity to advocate and become the energy behind change that is responsive to the people it serves?
- To take home guide with the tools to support your work, develop working resources, and enhance your outreach and capacity potential?
